

Barrel Manufacturing

Barrel Manufacturing

IWI US has only been operating in the United States for 4 short years, but we are able to bring over 60 years' experience in the manufacturing of firearms to the US with the support of our parent company, Israel Weapon Industries (IWI) Ltd. of Ramat Hasharon, Israel. IWI in Israel produces some of the most famous brands in the international firearms marketplace, including UZI®, Galil®, Tavor®, Negev® and Jericho®. The incomparable quality and accuracy of their cold hammer forged barrels are well known to militaries and law enforcement agencies in over 40 countries around the globe.

IWI US has invested heavily in a new GFM cold hammer forge, plus state-of-the-art deep hole drilling and honing machines, to produce the highest quality Cold Hammer Forged (CHF) rifle and handgun barrels in the US. We can offer American firearm manufacturers a competitively priced, high quality CHF barrel, with or without chrome lining, to your company's specifications.

Whether you need barrels for AR-15's, M4's or your own proprietary design, IWI US can build the barrel you want in a variety of calibers, including 5.56 NATO (.223 Rem), 7.62 NATO (.308 Win), 7.62x39mm and a multitude of handgun calibers.

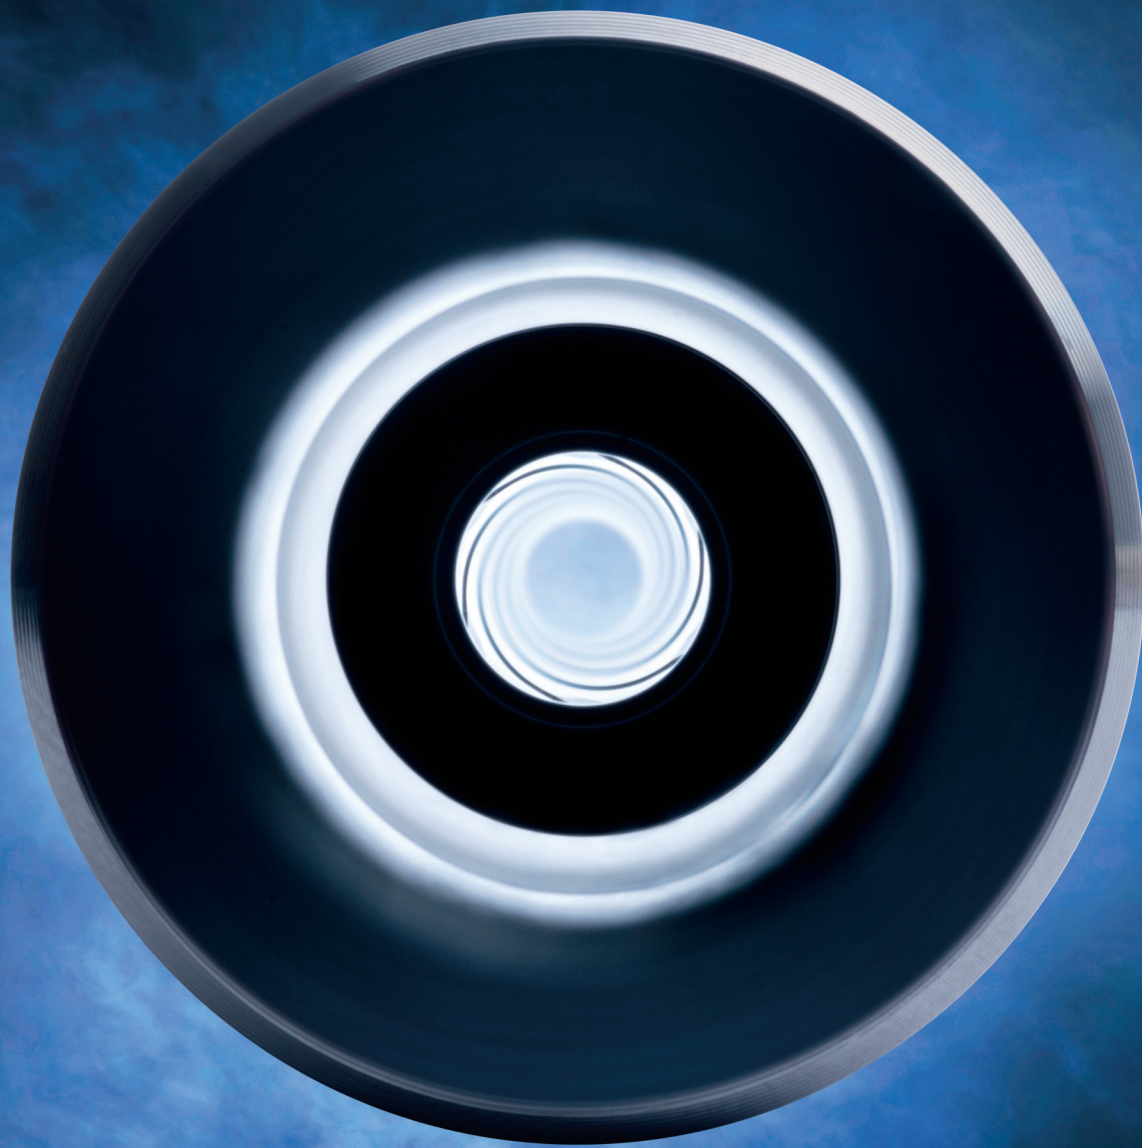

For further information on our OEM Barrel Manufacturing and how IWI US can fulfill or supplement your barrel supply needs, please contact:
