- ▶ CONSTRUCTION: HAND ASSEMBLED
- ▶ MUZZLE ATTACHMENT: 1/2x28 DIRECT THREAD
- ▶ COLOR: C-SERIES CERAKOTE, BLACK
- ▶ FULL-AUTO RATED: YES
- ▶ BARREL RESTRICTIONS: NONE

The IWI 22 silencer is a state-of-the-art, lightweight, reduced back-pressure solution for .22LR, 22WMR, .17HMR, and 5.7x28. Built with grade 9 titanium internals and a 7075 aluminum body for lightweight and durability, it withstands the precise and punishing demands rimfire and pdw caliber semi-autos, lever guns, and bolt actions of any variety can throw at it.

The reduced back-pressure design minimizes toxic gas exposure to the shooter and enhances weapon performance by maintaining a smooth cycling operation, helping to ensure longer parts life and maximize firearm compatibility.

The 22 features a 1/2-28 direct thread mount and is hand assembled to ensure its quality right from the start. Finished in C-Series Cerakote.
